

The IP Camera is an integrated wireless IP Camera solution. It combines a high quality digital video Camera with network connectivity and a powerful web server to bring clear to your desktop from anywhere on your local network or over the internet.

Whether it's office monitoring, home, warehouse or shop security, IP Cameras are the best, most effective and lowest cost security device to give maximum peace of mind. IP Cameras are flexible, simple and highly effective, with easy installation and setup. They are equipped with automatic night vision for day/night settings, and motion detectors which can be linked to an alarm to alert you instantly.

In addition, you can log on securely and view all your IP cameras remotely using a computer or iPhone or iPod Touch. You can also move the cameras remotely, utilising the digital pan/tilt functions, and record live video and audio
