

**Description**

Eurologix LTD distributes M.M.C International which is specialized in the production of Narcotic and Precursor identification Tests. The Narcotic and Precursors Tests are developed in close co operation with Police and Customs & Excise authorities. The company is certified by Veritas and awarded with the EN SO 9001-2000 Certificate. Eurologix group has a worldwide network of approx 30 distributors.

M.M.C. International's laboratory is especially focussed on the production and development of narcotic identification products. The tests are produced in accordance with the requirements set by the Police Forces, Customs and Excise and Forensic Laboratories.

The ampoules are filled with special treated solid materials which are impregnated with very high quality reagents and a blanket of high purity nitrogen and hermetically sealed. Each batch is continually tested and registered.

All products are stamped with a batch number, production and expiry date.

The Major clients are: Police, Customs & Excise, Prisons and Law Enforcement Authorities
