

Description

The Offender Tracker is a single-unit device, encompassing a CPU and GPS GSM/GPRS technology that provides location tracking of offenders in the criminal justice system. The Offender Tracker fastens to the offender's ankle and can only be adjusted or removed by the supervising officer. The Offender Tracker is accompanied by our 24/7 State-of-the-art Offender Monitoring Center. As the leader in location tracking (telematics), our technology, along with highly trained response specialists, contribute to creating a safer world.

Supervising Officers have remote access to our software 24/7 to view or modify offender information. In addition, supervising officers have 24/7 access to our Offender Monitoring Center and customer support number.

Our Offender Monitoring Center assists the supervising officer in managing their case loads. Through our technology and equipment, the monitoring center is constantly analysing the data it receives from the Offender Tracker, when an offender is in violation of the restrictions; and operator immediately contacts the offender through Offender Tracker to inform them of the violation. In addition the operator notifies the supervision officer of the violation if requested.

Specifications

- GPS Receiver Accuracy: 20m: 50%
50m: 95%
- Cellular Service: GSM/GPRS
- Speaker Phone Volume: 80dba at 30cm nominal, 75 dba min
- Removable Primal Battery Type: Li-ion Rechargeable 20+ hours
- Secured Internal Battery Type: Li-ion Rechargeable 90 mins
- Size: 3.5 x 4 x 1.25" (W x T x D)
- Water Resistant Depth: up to 3m
