SB.4 HD Manual Raise Arm Barrier

Standard boom lengths range from 3 metres up to 7 metres, we can also cater for increased lengths if specified, ensuring complete traffic management controlling incoming and outgoing vehicles. It comprises a high quality aluminium boom with counter balanced weight and padlock facility for vertical and horizontal positions. The standard colour is red, with a plain yellow or white boom. Red or black stripes are available at an extra cost.

Features

- To restrict the access to controlled areas, the arm can be lifted manually to allow authorised vehicles to enter.
- The raise arm barrier can be locked in the up and down positions.
