

### Description

The Video Scope is the worlds only B/W, high resolution, low light videoscope designed specifically for elite Security applications including police surveillance covert prison monitoring, S.W.A.T., border patrol and drug enforcement applications. Unlike a fibroscope which uses bundles of fibres to transfer light from the top of the scope to a camera, thus comprising the image quality and light sensitivity, this videoscope has a 1/4" CCD camera with a 4mm, f20 lens built right into the 8mm diameter tip. This gives the user the versatility of a fibroscope with the image quality of a high-resolution, low light CCD camera. The 4-way articulation allows the unit to move 120 degrees each way horizontally and 120-160 degrees in the vertical. The 160 degree vertical motion allows the user to see back from the point of entry.

No longer do you have to have several devices and cables everywhere to do a difficult inspection, capture audio and video and still images. The system has everything built-in in a very easy to use package. The keyboard is splash proof and the Monitor/Control Unit/light source snaps shut and has a convenient carrying handle that slips out to make transport easy and simple. The state-of-the-art Sony CCD coupled with the extra-white (5000° Kelvin) metal halide light source provide a very bright and high resolution image on the integrated large LCD colour monitor. The compact flash card makes capturing images, video and audio a simple task. The USB connectivity of this unit also provides a great way to transfer all your inspection data to your computer.

### Features

- High resolution 400TV line CCD camera built into the tip
- 4-way articulation offers 240 - 280° of flexibility
- B/W CCD for optimal light sensitivity, 0.1lux with 4mm, f2.0 lens
- Easily fits underneath a door
- 1500mm long, 8mm diameter with 5-way articulation (5' x 5/16")
- Optional Monitor Kit available (V-LCD4-PRO-KIT)
- Unique body design allows single hand operation for articulation
- Ideal to elite surveillance applications including Polic, S.W.A.T. and drug enforcement

V-LCD4-PRO-KIT (optional)
